EDUCATION

National University of Singapore
Bachelor of Computing in Computer Science

Expected May 2029

Sutomo 1 High School, Medan
Mathematics and Natural Sciences

2022 - 2025

- GPA: 97.37/100

PROJECTS

StudyPet (AI-Powered Study Companion) | React, TypeScript, Cognition, Python FastAPI, Gemini API July 2026

- Built and deployed a full-stack gamified study app using React, TypeScript, FastAPI, and Supabase, with the frontend hosted on Vercel and backend on Google Cloud Run.
- Implemented a retrieval-based AI study pipeline that transforms uploaded PDF, DOCX, and PPTX materials into summaries, quizzes, and grounded chatbot responses.
- Designed a world-map break mini-game with server-side barter logic, randomized trade chains, and a persistent 15-minute cooldown across page refreshes.

Threadly (Web Forum) | React, TypeScript, Go, PostgreSQL

Jan 2026

- Built a full-stack discussion forum with React, TypeScript, Go, and PostgreSQL, supporting JWT-based authentication, topic-based threads, comments, voting, search, and sorting.
- Designed a relational PostgreSQL schema for users, posts, comments, topics, votes, and comment votes, and implemented RESTful APIs in Go for core forum workflows.
- Integrated frontend and backend services to support authenticated posting, browsing, commenting, voting, and profile statistics across the application.

EXPERIENCE

Software Development Executive, NUSSU Communication Cell

Jan 2026 - Present

- Maintained and enhanced the NUSSU website by implementing content and UI updates for student-facing pages, supporting ongoing platform usability and accuracy.
- Shipped website updates and EDM assets with the Tech Lead, helping deliver time-sensitive communication campaigns and platform changes.
- Built and updated reusable page components and web content in collaboration with the Publications Platform Branch to support consistent digital communications.

Frontend Developer, PPIS Tech Division

Jan 2026 - Present

- Contributed to the PPIS website revamp by building the Committee page frontend using React and shadcn/ui.
- Implemented reusable UI components and responsive layouts to support consistent styling and maintainability.
- Collaborated with the team on frontend integration and page updates for the revamped website.

Subcommittee, NUS Students' Computing Club

Nov 2025 - Present

- Lead programme planning for Computing Day 2026, design station activities and participant flow for an event targeting 1,000+ attendees.
- Coordinate logistics, manpower allocation, and vendor arrangements for large student events, including LifeHack 2026 with 300+ expected participants.
- Manage operational planning across event activities to support smooth execution and participant experience.

Tutor, HN Private, Medan, Indonesia

July 2022 - June 2025

- Tutored 20 middle-school students through customized lesson plans, strengthening subject understanding and academic performance.
- Designed interactive learning activities to improve engagement and reinforce key concepts.

TECHNICAL SKILLS

- Languages: Python, Java, Go, JavaScript, TypeScript, SQL
- Frontend: React, HTML, CSS
- Backend: FastAPI, REST API design
- Databases: PostgreSQL
- Tools: Git, Docker

AWARDS AND LANGUAGE CERTIFICATIONS

- **Awards:** American Mathematics Olympiad, Bronze Medallist, 2024
- **Languages:** English — IELTS 8.0 | Chinese — HSK 6, TOCFL C1 | Bahasa Indonesia — Native
